AIMST

**AI Manufacturing & SCADA Technology
Conference and Exhibition**

**Empowering Tomorrow:
AI-Driven Innovation in Industrial Automation**

NORTH AMERICA'S LEADING **INDUSTRIAL AI** CONFERENCE

Featuring two days of world-class content across two conference tracks, an exhibit & networking lounge, 8+ networking events, a 1:1 meeting program, and more. Attendees of the event will leave with the knowledge to improve their systems to enable them to better monitor/control equipment, optimize value, prevent OT/IT attacks, increase supply chain efficiency, and harness valuable data to optimize processes.

The SCADA Technology track is the world's leading SCADA forum bringing together SCADA directors, engineers, operations and IT professionals from the electric/TD, water & wastewater, oil & gas, telecommunications, transportation and industrial automation markets to discuss the latest developments in critical infrastructure and industrial control systems.

The AI Manufacturing track will cut through the hype to provide a comprehensive program and plans for action, assisting manufacturers in decreasing downtime, improving profitability, and staying competitive. Hear from and network with manufacturing and technology experts on their AI journeys; from lessons learned to ROI. The track of manufacturing, digital transformation leaders, IT Directors and others tasked with evaluating new technologies and accelerating their digital transformation.

FEATURING 3 TECH TRACKS

AIMST is the world's leading conference & expo focused on providing in-depth discussions and solutions for heads of manufacturing and SCADA professionals to accelerate their digital transformation and transform their operational systems.

AI Manufacturing

The AI Manufacturing track will provide a comprehensive program and plans for action, assisting manufacturers in decreasing downtime, improving profitability, and staying competitive.

SCADA Technology

SCADA Tech brings together electric, water, oil & gas, transportation, and industrial automation experts to discuss the latest developments in critical infrastructure, IT/OT and industrial control systems.

Industrial AI 101 for SMEs

SMEs often struggle to navigate AI complexities. This introductory track demystifies Industrial AI, providing practical insights on how SMEs can leverage AI for efficiency, productivity, and competitiveness.
